

ANTHONY RIVERA

Senior Software Engineer |
.NET Specialist | Full-Stack
Developer

Senior Software Engineer | .NET Specialist | Full-Stack Developer

Strategic Software Engineer with over 10 years of experience delivering high-quality web and mobile solutions. Expert in the .NET ecosystem (C#, .NET Core) and database management (SQL Server, MySQL), with a proven track record of optimizing system performance and ensuring high availability for mission-critical projects.

A proactive leader and Scrum practitioner focused on driving digital transformation through clean code and scalable architecture. Native ability to bridge the gap between complex business requirements and technical execution in international environments. English Level: B2.

SKILLS

Frontend: VueJs, Angular, ReactJs

Backend: C#, Visual Basic, ASP .NET, Razor, MVC, Net Core, .Net 5, Javascript, NodeJs, Express, Api Rest, Axios, NestJs NetCore2.3, .Net5, Net 7, Golang, Flask(Python), TypeScript.

DataBase: Sql Server, Mysql, PostgreSQL, Oracle Free

Repository: Github, Bitbucket, Gitlab

Cloud: Azure, AWS

WORK EXPERIENCE

Software Engineer

Mercado Libre | June 2023 - Present

- Building scalable, maintainable backend systems using Node.js and TypeScript, with frontend integration through React, Angular, and Micro Frontends architecture.
- Development in Golang and Python with CI/CD pipelines. Focused on system optimization and software reliability.

Senior Full Stack

Leal S.A.S | May 2022 - June 2023

- Developed scalable frontend and backend features using Node.js, Angular, React, and Micro Frontends. Built Golang services with AWS CI/CD, ensuring reliable deployments, and automated workflows with Python.
- Integrated Iterable across the UI and backend, boosting user engagement through personalized campaigns and event automation.
- Committed to strong typing, clean architecture, and maintainable logic—TypeScript turned uncertainty into reliability.

Senior Full Stack

PersonalSoft. | May 2021 - April 2022

- Led the design and implementation of scalable backend services using Node.js, TypeScript, and NestJS, following a modular architecture based on domain-driven design (DDD) and event-driven patterns. Integrated microservices with RESTful APIs and asynchronous messaging via RabbitMQ and AWS SNS/SQS.
- Developed frontend components in React, Angular, and Vue.js, applying micro frontend architecture for team-based delivery and independent deployment.

Full Stack Developer

SoftLogic | October 2019 - April 2021

- Developed backend components in C# for application integrations and business logic, ensuring modularity and maintainability. Diagnosed and resolved business challenges through targeted data analysis and system optimization.
- Built frontend and full-stack applications using Angular, React, Node.js, and TypeScript, deployed via Azure DevOps with CI/CD pipelines.

.Net Developer

Tecnoglass S.A | October 2017 - October 2019

- Migrated and modernized legacy .NET applications, implementing new features in C# to improve performance and maintainability.
- Maintained and extended internal tools built with Flask and MySQL, ensuring operational stability and data integrity. Delivered robust desktop and web-based solutions, integrating TypeScript into frontend components for enhanced reliability and scalability.

ANTHONY RIVERA

Senior Software Engineer |
.NET Specialist | Full-Stack
Developer

Freelance

Social Welfare Project | Full-Stack & Mobile Developer

Focus: Digitization of citizen services and real-time communication systems.

- Designed and implemented cross-platform mobile and web solutions to streamline social service delivery.
- Developed robust RESTful APIs and integrated Push Notification systems to ensure instant user engagement and real-time updates.

DIAN Project (Public Sector) | C# Backend Developer

Focus: High-availability and mission-critical electronic invoicing.

- Engineered and maintained core C# logic for the national electronic billing platform, prioritizing High Availability (HA).
- Optimized legacy code and database interactions to ensure system stability under massive transactional loads and strict regulatory compliance.

US-Based Technology Partner | Senior .NET Developer & Project Lead

Focus: International scalability and event-driven solutions.

- Led the implementation and management of high-scale projects, significantly improving service response times and backend efficiency.
- Developed a specialized mobile application for webinars and conferences, featuring automated scheduling, ticket purchasing modules, and real-time user interaction.

WORK EXPERIENCE

.Net Developer

Energia Solar S.A | February 2017 - August 2017

- Maintained and updated Visual Basic desktop applications and MySQL databases to ensure operational continuity and typescript
- Provided end-user support and resolved technical issues across internal systems.
- Developed backend tools using Python to streamline internal workflows and automate repetitive tasks.

System Analitic

SGS S.A.S | March 2016 - April 2017

- Development of applications in Asp.Net, C#, MVC, Stucture Procedure in Sql Server.
- Technical support to the company's platform.
- Development of new technologies.
- Support to users of the platform.
- Creation, Modification to the Database in Sql Sever.

System Developer

Compendios S.A.S | July 2015 - December 2015 -

- Application development in Asp.Net, C#, MVC, Stucture Procedure in Sql Server.
- Mobile Developer using PhoneGap and ionic v1.
- Technical support to the company's platform.
- Development of new technologies.
- Support to users of the platform.

System Analitic

CS3 - Comercializadora, software y servicio | February 2014 - June 2015

- Development of applications in Genexus software using C#, with connection to Sql Server.
- Technical support to the company's platform.
- Development of new technologies.
- Support to users of the platform.
- Creation, Modification to the Database in Sql Sever.

ACADEMIC BACKGROUND

Universidad Autonoma Del Caribe

Ingeniería de Sistemas | January 2010 - December 2015
